EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.

Comments:

I am wondering why it takes 1 1/2 weeks to get results for well users. I convinced a friend to get their well water tested and there was only one place to get it tested in San Juan Count New Mexico. The live at Cedar Hill, between Durango and Aztec and this was way out of their way to go to get it tested. Then to be told 1 1/2 weeks for results. I'm sorry but there is going to be problems with this type of service provided for the residents that are affected.
Please, Please, Please do better and take care of these residents.
